SAM H. BOBER'S

1944 Fair Price Catalog of Hardest and Best Yielding
Field and Garden Seeds

NEWELL, SOUTH DAKOTA

NEW BRUNKER OATS—HIGHEST YIELDING AND EARLIEST MATURING FOR
WESTERN STATES

SPARTAN BARLEY—RECORD YIELD 80 BUSHELS PER ACRE

COSSACK ALFALFA—SECOND CUTTING—HEAVIEST YIELDING—GROWS IN EVERY
STATE IN THE UNION

BEST YIELDING NEW MARTIN COMBINE MILO

EVERY GOOD HARVEST Comes from Good Seed

"SAM" in a field of Spartan Barley

To Our Good Friends the FARMERS and GARDENERS:

You are playing a vitally important part in the war effort by producing more food than ever before. Food, so vitally necessary to the welfare of our military forces, civilian population and our Allies.

It is all-important to sow only the most productive and high-germinating seed. To supply such seed is our responsibility and we will spare no effort to bring you the highest quality seed to help you

in reaching the goals set.

You will find in this catalog, the best yielding strains and varieties, the kind that will pay you most for your season's work. **Order early.** Alfalfa and many Field Seeds are short this year. We advise ordering immediately.

Yours for Victory,

SAM H. BOBER.

Mrs. Bober and our son
Lt. Louis M. Bober

TERMS OF SALE AND SHIPMENT

Payment: Cash in full with order. Money order, bank draft or check on good bank. We ship promptly on receipt of your order. All items are priced f.o.b. Newell except garden seeds, which are prepaid.

Newell is in Butte County, on the northern foothills of the Black Hills, about 3,000 feet above sea level, about 30 miles from Montana line. We ship on the C., N. W. and Milwaukee Railroads and with the Buckingham and Wilson Trucking Companies, and connecting with other lines.

PLEASE ORDER ALL FIELD SEEDS AT ONCE

(1) Help yourself to better yields by ordering these seeds real early for early planting; (2) Help Uncle Sam by shipments in midwinter instead of crowding transportation in the spring; (3) Help us by letting us fill your order for all seeds in midwinter when help is easier to get.

YOUR CO-OPERATION WILL BE APPRECIATED.

BUY EARLY and SAVE MONEY

Ten Reasons Why You Should Plant

PROF. HANSEN'S SIBERIAN COSSACK ALFALFA

Grows in Every State in the Union

1. It is the hardiest alfalfa known; 2. A better soil builder than other alfalfa; 3. More drought resistant; 4. Will make a big crop of hay in a dry season when others fail; 5. Has a double root system, both branched and deep; 6. Makes finer quality hay; 7. Will yield more hay per acre no matter what the weather conditions are; 8. Freezing does not kill young plants, neither does it kill or injure the growing hay; 9. Requires less seed per acre than other varieties; 10. Hogs do not kill it out in pastures, as they do other strains. **COSSACK, the World's Finest Alfalfa.** Means more hay and a longer lasting stand. Purity 99.5 per cent; 90 per cent or more live seed. Dollar for dollar your best alfalfa buy.

10 lbs. \$5.40; 30 lbs. \$15.85; 60 lbs. \$31.20; 100 lbs. \$51.50

One of the large fields of Cossack alfalfa from our seed, on the Bones Stock Farm, Parker, S. D. Mr. Bones writes, "Your Cossack alfalfa not only yields the most per acre but dries better, preserves the leaves and makes the most wonderful hay."

LADAK ALFALFA

Originated in the very high mountainous section of India. It has proved very hardy and drought resistant and it is also wilt resistant. The supply of this seed is very limited. 99.5 per cent purity, 90 per cent or more live seed.

10 lbs. \$6.10; 30 lbs. \$17.50; 60 lbs. \$34.50; 100 lbs. \$57.00

LADAK AND COSSACK ALFALFA MIXED

For sections of country where wilt disease bothers alfalfa we recommend this mixture composed of half Ladak and half Cossack alfalfa for resistance to disease and at the same time high yielding ability of hardy alfalfa. 99.3 per cent purity, 90 per cent or more live seed. Fancy quality.

10 lbs. \$5.50; 30 lbs. \$16.25; 60 lbs. \$31.80; 100 lbs. \$52.50

SATISFIED CUSTOMERS THE BEST RECOMMENDATION

Among the hundreds of letters we received from satisfied customers from different parts of the country we had one from our friend and customer, Ed Morgan, Fallon, Nevada, who, in spite of frosts and cold weather, had one of the biggest crops of alfalfa hay in his county from the Cossack Alfalfa we shipped him three years ago.

Along with the letter we received a carton containing a big bushy plant of Cossack alfalfa six feet tall. Who can beat that?

BLACK HILLS IMPROVED GRIMM ALFALFA

Improved through selection and breeding by Prof. Wheeler and Dillman on the Government Station here and at Brookings. This Grimm alfalfa shows a decided superiority over the parent stock. 99 per cent purity, 90 per cent or better live seed.

10 lbs. \$5.30; 30 lbs. \$15.50; 60 lbs. \$30.60; 100 lbs. \$50.50

DAKOTA NO. 12 ALFALFA

A native of the dry land in the Black Hills. More drought resistant, hardier and better yielder than ordinary northwestern alfalfa. 99 per cent pure, free from noxious weeds. 90 per cent live seed.

60 lbs. \$30.20; 100 lbs. \$50.00

FARM BELT ALFALFA

A mixture of Cossack, Grimm, and Common alfalfa seed not quite as bright colored or plump as the rest. Well cleaned, and will do everything for you that the higher priced seed will do. No noxious weed seeds. 98 per cent purity, 85 per cent live seed. There is a substantial saving in the price.

60 lbs. \$27.15; 100 lbs. \$45.00

Former President and Mrs. Coolidge inspecting a dryland alfalfa field while on vacation here in 1927. Sam Bober's Hardy Alfalfa Seed is planted on the Coolidge farm in Vermont and our Cossack alfalfa is producing real well on President Roosevelt's Hyde Park farm in New York.

Showing double root system of three-year-old Cossack alfalfa, also the stooling habit above the crown, which makes bushier, finer stemmed and immense yields of quality hay.

NOTICE

The price you pay for the alfalfa seed also includes the cost of the seamless bags and the cost of inoculating the seed with Legume-Aid inoculation, so it will be ready to plant and will get a good start for you. The inoculation is good for six months from time of treatment.

Smooth BROME GRASS Is Heaviest Yielding Hay and Pasture Grass

Smooth Brome Grass is a Giant Bluegrass—hardy and permanent and it roots deeply, sometimes 4 and 5 feet deep, making it stand dry and hot weather as well as the coldest winters.

It is the first green grass in the spring and the last in the fall and keeps green all summer when other grasses are dried.

All classes of livestock like it. Very palatable. As it is a grass, it cannot poison stock. Easily killed out under cultivation if you want to remove it. It is important to seed it as early as the ground can be worked. Very little if any injury from frost.

Seeding is done by hand, by Cyclone or endgate drill, unless some coarse grain is mixed with it. Plant at 15 to 20 pounds per acre, where it is seeded alone. Do not cover deeply— $\frac{1}{2}$ -inch deep is sufficient. Old pastures should have a light discing, then seed and roll. Rolling or packing will give a better stand. No. 1 seed, free from fowl weeds.

Smooth Brome Grass

10 lbs. \$2.40; 25 lbs. \$5.50; 50 lbs. \$10.00; 100 lbs. \$19.00

Wheatgrass is not only the most profitable for beef cattle but is also the best year round permanent pasture for production of wool and mutton on western ranches

Photo by the Black Hills Studio

CRESTED WHEATGRASS Builds Beef and Mutton

A drought resistant, long lived perennial bunch grass, introduced by Professor Hansen of South Dakota State College, who found it in Siberia, from where he also introduced Cossack Alfalfa.

IMPROVED FORAGE TYPE of Crested Wheatgrass is finer stemmed and possesses 10 per cent more leaf and is definitely superior to the standard types. It becomes green in the spring earlier than other grasses and stays green later in the fall. It produces twice as much pasture and hay of high palatability and nutritive value as native grass. Produces twice as much beef, mutton and wool and shows no bad effect from heavy grazing. Broadcast 10 to 12 lbs. per acre. It has the ability to grow in low temperatures and starts growing earlier. Plant it early in the season. The very best top quality seed of the heavier yielding Forage Type strain:

10 lbs. \$2.60; 25 lbs. \$6.00; 50 lbs. \$11.00; 100 lbs. \$21.00

No. 1 grade Standard Crested Wheatgrass:

10 lbs. \$2.40; 25 lbs. \$5.25; 50 lbs. \$10.00; 100 lbs. \$19.00

ALL SEASON PERMANENT PASTURE

Meat and Milk Without Grain Feeding

A most practical life-long pasture and hay mixture composed of equal parts of Smooth Bromus grass, Cossack alfalfa, wheatgrass and ryegrass. Cattle and sheep are fond of it. Its great value is that it will grow well on poor land, but naturally the better the soil the better it will grow. **It has two to three times the carrying capacity of ordinary pastures.** It is most valuable in withstanding the most rigorous test of heavy grazing and yields heavy crops of hay, relished by, and highly nutritious for all livestock.

Here is a pasture that comes up two weeks earlier every spring and stays green later in the fall than other pastures, and in winter months the wheatgrass part of the pasture can be grazed.

Every plant is a **PUMP**. Double rooted Alfalfa and deep rooted grass produce drought defying pastures.

This pasture mixture should be planted at the rate of 12 to 15 pounds per acre, about one-half inch deep, early in the spring on firm land; stubble land is good. Order early, we will ship promptly and you plant it early.

25 lbs. \$7.00; 50 lbs. \$13.50; 100 lbs. \$26.50

All Season Permanent Pasture is well adapted to alternate grazing. One-half is being pastured while the other half is growing up again.

PORK FROM PASTURE

Permanent Hog Pasture Mixture contains the following mixed in the right proportion to produce the greatest feeding value:

Alfalfa.
Red Clover.
Alsike Clover.
Sweet Clover.

White Dutch Clover.
Domestic Rye Grass.
Bromus Inermis.
Timothy.

This mixture can be sown any time, from early spring until midsummer, and does not require any particular kind of soil, in fact, any soil that produces crops of small grain or corn, will answer the purpose. Because of the large amount of legumes it contains, it serves the double purpose of providing the hogs with pasture of high feeding value, and building up the soil at the same time. Sow 15 to 20 lbs. per acre.

25 lbs. \$7.00; 50 lbs. \$13.50; 100 lbs. \$26.00

War requires tremendous increases in meats and dairy products, and the foundation of such production is pasture.

DRY LAND PERMANENT PASTURE MIXTURE

High altitude seed produced from the hardest known strains, grown without irrigation. Well adapted to the inter-mountain region as well as lower country of the Western and Southwestern states. Composed of two parts Forage-type Crested Wheatgrass and one part of each of Slender Wheatgrass, Smooth Brome Grass, Domestic Ryegrass and Dwarf Yellow Sweet Clover.

25 lbs. \$5.50; 50 lbs. \$10.50; 100 lbs. \$20.00

GROW QUICK PASTURE MIXTURE 3.40 25 Lbs.

For Cattle, Sheep and Hogs

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

Contains equal parts of Sweet Clover, Domestic Ryegrass, Timothy, Rosen Rye. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost.

The Ryegrass and Rosen Rye in this combination are fast growers and afford the earliest feed. Meanwhile the Sweet Clover and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Sweet Clover, Timothy and most of the Ryegrass of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 20 lbs. per acre. Sow about the time you sow small grain. Do not use a nurse crop.

50 lbs. \$6.25; 100 lbs. \$12.00, including bags

Lambs on Grow Quick pasture

BROME and ALFALFA

A Fifty-Fifty Mixture of Quality Seed

I sincerely hope large numbers of our customers will sow a mixture of our Brome Grass and Alfalfa this year. It makes very heavy crops of hay that cure quicker than straight Alfalfa and is equal to it in feeding value. Both are very drought resistant. They supplement each other in a remarkable way. Pasture test for an average of three years, an acre of Brome-Alfalfa produced 3,933 pounds of milk and had an average of 145 pasture days. Straight Alfalfa produced 3,606 pounds of milk and provided 124 pasture days. In another test the mixture pastured by sheep gained 362 pounds per acre. Straight Alfalfa 309 pounds.

All cleaned seed. Sow about 16 lbs. of the mixture per acre.

\$17.50 for 50 lbs.; \$34.00 per 100 lbs., including bags

Not only does an Alfalfa-Bromus mixture produce more hay, but it is a much better soil gripping crop on rolling erodible land.

New BRUNKER OATS

Rapid Grower, Earlier Maturity and Higher Yields

A new introduction of earliest maturing, smut and drought resistant oats of real quality. Tried out at four separate Government and State Experiment Stations it outyielded all other varieties by from 18 per cent to 39 per cent more oats per acre. Plant it as early as you do spring wheat, harvest it earlier than any other early oats and get more bushels per acre. We recommend it to all western farmers. Good stock limited—order at once. Seed like this does not cost you anything. It produces enough more grain per acre to more than offset the total cost of the seed.

5 bu. \$5.75; 10 bu. \$11.00; 20 bu. or more \$1.05 per bu., including shipping bags

RUBY, higher yielding, earliest maturing spring wheat

Ruby Wheat, because of its very early maturity, makes an ideal nurse crop for alfalfa. It is a smooth bearded **higher protein variety**, which usually brings a premium on the market. Order early for early planting.

5 bu. \$8.00; 10 bu. or more \$1.55 per bu., including bags

We especially recommend this wheat for upland, where it outyields other varieties because of its earlier maturity.

TREBI BARLEY

Canadian six row high yielding Trebi Barley for irrigated land or where moisture is plentiful.

5 bu. \$7.50; 10 bu. or more \$1.45 per bu., including bags

BEARDLESS BARLEY

A very early maturing variety used for pasture, hay and grain on dry upland. Seed stock is limited—order early.

5 bu. \$7.50; 10 bu. \$14.50, including bags

DWARF ESSEX RAPE

A quick-growing pasture that produces more pork and mutton per acre. Plant it early in the spring for all summer pasture or broadcast in the corn field just before last cultivation, to make good fall pasture for hogging and sheeping off.

5 lbs. \$1.15; 10 lbs. \$2.00; 25 lbs. \$4.75

BARLEY THAT EVADES DROUGHT

NEW SPARTAN HEAVIEST PRODUCING BARLEY

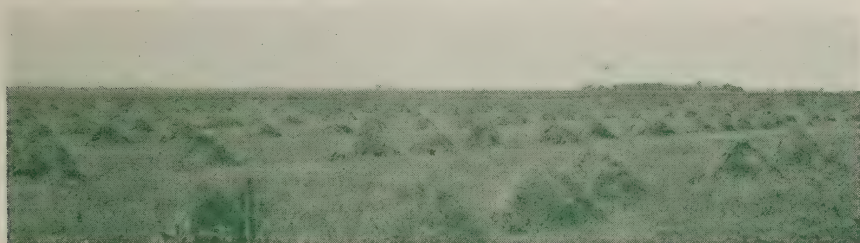

Ripens Ahead of Hoppers, Drought and July Heat

The highest yielding, earliest maturing variety, a cross of Michigan barbless and two-row varieties, with strong straw which prevents lodging. It is smooth bearded, easier to handle and equals corn in feeding value.

You can plant it early in March because it is cold resistant. Ripens before hot and dry winds in July injure other varieties. A customer writes, "This seed did not cost me anything. The extra yield above the barley I had been using more than paid for the seed."

It made a record here of 80 bushels per acre of the heaviest, most beautiful barley, weighing 56 lbs. to the bushel. The judges at the State Fair awarded it **FIRST PRIZE**. Order early and plant it early.

500 lbs. \$15.00; 1,000 lbs. or more \$2.95 per 100 lbs., including bags

Winter Oats in shock on the 5,000 acre Bones Stock Farm, who buy all their field seeds from us

WINTER OATS

117 bushels per acre on dry land. This new introduction of earliest maturing oats yielded 30 or 50 per cent more oats per acre than the next best variety alongside of it. These oats are called Winter Oats because they are cold resistant but are planted quite early in the spring, making their growth during the most favorable moisture and weather conditions. They contain about 6 per cent barley, but our sheepmen and cattlemen do not mind that, because of their high yielding ability.

One customer writes, "We threshed all day but the shocks were so thick a fellow couldn't see we'd made any headway."

5 bu. \$5.50; 10 bu. or more \$1.05 per bu.; 20 bu. or more \$1.00 per bu., including bags

ROSEN RYE

For Quick Pasture

For quick pasture, plant Rosen Rye early in the spring, a bushel and a half per acre. This will furnish pasture until about the latter part of July. For all summer pasture plant Grow Quick Pasture Mixture described on page 7, which will also furnish pasture the following year.

5 bu. \$7.25; 10 bu. \$14.00, including bags

GOOD SEED GRAIN IS SCARCE

Send Your Order in Right Now. For every 32 bushels of seed grain, order one pound of New Improved Ceresan to control smut, 80c lb.

WE'LL EGG THE DAYLIGHTS OUT OF
BENITO, HITLER, AND HIROHITO

Prof. Hansen's PROSO GRAIN MILLET

Eggs are very close to the top of the list of food-for-victory items. Are your birds carrying their share of this extra production burden?

We'd like to see you try Prof. Hansen's Proso Grain Millet in your ration. This high protein feed is necessary for heavy production. It will keep your chickens healthy and will produce many more eggs.

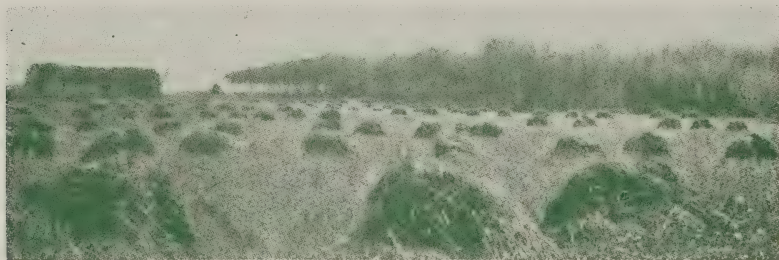

A Grain Crop in Sixty Days

This Russian introduction yields fifty to eighty bushels per acre. It takes only sixty or seventy days to mature a grain crop. This is one of the most versatile crops in the country and can be grown everywhere, on dry land and on irrigated land, low land or upland. It can be used for hay or mature for grain. It makes a wonderful chicken feed and it is also used for fattening turkeys and livestock. We counted 1,500 kernels on one plant of Proso.

On dry land plant twenty pounds per acre, any time from May 1st to August 1st. In sections with better rainfall plant it at the rate of 30 lbs. per acre with a grain drill. Harvest the same as you do grain.

10 lbs. 80c; 25 lbs. \$1.30; 50 lbs. \$2.50; 100 lbs. \$4.25; 500 lbs. \$20.50

Mighty High in Goodness—Mighty Low in Price

A field of Proso that yielded 75 bushels of grain per acre

HAY MILLETS

KURSK RUSSIAN MILLET

A very fine variety of millet, extremely hardy and withstands drouth. The plant shows a remarkable stooling habit, as many as 30 to 40 stalks frequently growing from one seed.

Prices: 50 lbs. \$2.50; 100 lbs. \$4.50; 300 lbs. \$12.90

WHITE WONDER AND GERMAN MILLET

A wonderful producer of hay and exceedingly valuable as a food for cattle and sheep. Like other millets it has a very low water requirement and is an excellent dry land crop. Produces 4 or 5 tons of hay per acre.

Prices: 50 lbs. \$2.45; 100 lbs. \$4.25; 300 lbs. \$12.00

BOBER'S SEED CORN

For **BIGGER YIELDS** on Western Lands

Gehu Flint—70-day corn

Falconer—75-day semident

Northwest Dent—85-day corn

Early Minnesota No. 13 Yellow Dent

Squawcorn—80-day (for hogging or sheeping off)

Rainbow Flint—Highest yield for silage

Price for above seed corn including bags:

$\frac{1}{2}$ bu. **\$3.00**; 1 bu. **\$5.65**; 5 bu. **\$27.50**

HYBRID CORN THAT YIELDS MORE AND IS BETTER FEEDING

For the West and Southwest

Yields 20 to 50 per cent more per acre than any other corn we have tried. It is the hardiest and most drought-resistant of all Certified Hybrids, with the widest adaptability. Produces good corn under adverse conditions. Every kernel is carefully graded to run through your planter uniformly.

90 to 100 day Hybrid. Earliest maturing, winner of the Silver Trophy for highest yield per acre. Just cob enough to hold the kernels together. What better recommendation.

$\frac{1}{2}$ bu. **\$4.50**; 1 bu. **\$8.50**; 5 bu. **\$42.75**

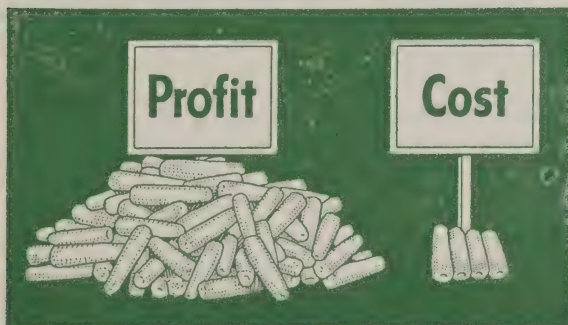

100 to 110 day Hybrid. This cold and drought resistant yielder of bumper crops of better feeding corn has done the best for our customers in the west and in the southwest. It is a few days later maturing than our earliest maturing.

$\frac{1}{2}$ bu. **\$4.00**; 1 bu. **\$7.50**; 5 bu. **\$37.50**

Hybrid Corn

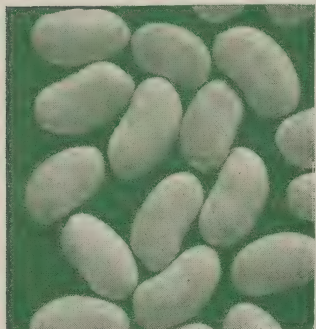

ORDER ALL SEED EARLY THIS YEAR

**DUST YOUR SEED
CORN WITH NEW
IMPROVED SEME-
SAN JR.**

To increase the yield from three to five bushels per acre and for insurance against disease and unfavorable weather. **56c per 12-oz. can**—will treat seed corn for 28 acres.

Greatest Demand in History for BEANS
Uncle Sam Needs 50% More BEANS for the Army and
the Navy in 1944
IMPROVED GREAT NORTHERN BEANS

Great Northern Beans
 (Natural size)

Yield 30 to 50 bu. per acre. A ready cash market as soon as harvested. These beans are larger than the common navy and more palatable.

10 lbs. \$1.40; 50 lbs. \$5.30; 100 lbs. \$10.00

IMPROVED PINTO BEANS

The leading commercial bean of the West. They do well on the dry as well as on the irrigated land. Resemble the Great Northern in size and shape. A real cash crop.

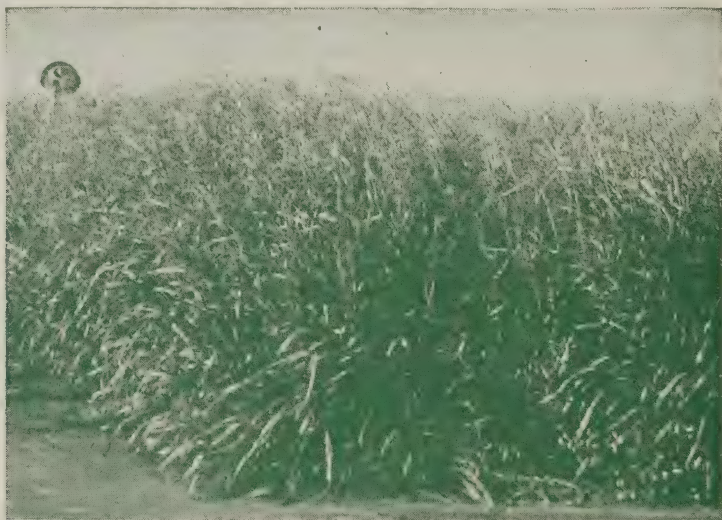

10 lbs. \$1.40; 50 lbs. \$5.30; 100 lbs. \$10.00

NEW IMPROVED TEPARY WHITE BEANS

Yield More than Soybeans

The highest yielding, earliest maturing selection by the U. S. Experiment Station at Redfield, S. D. A bushy plant with seeds similar to the navy bean but smaller in size. Our 70-acre field of these beans was destroyed by hail. We cannot offer them in large quantities.

10 lbs. \$2.00; 25 lbs. \$4.50—Order early!

Sudan Grass

Cut Feed Costs with SUDAN GRASS

Grows Quickly—3 to 4 Tons Hay from One Cutting

Sudan grass grows rapidly and thrives in the hot dry months when other pastures are least productive. Especially valuable as a supplementary pasture to provide an abundance of feed of good quality during that period of the summer when it is most needed.

Will grow on almost every class of soil. Stock of all kinds eat it greedily. On dry upland plant at the rate of 12 pounds of seed per acre. On better land 15 to 25 pounds of seed per acre. Plant when the soil is fully warmed up.

The seed crop was the shortest in 25 years. Order at once.

25 lbs. \$3.75; 50 lbs. \$7.00; 100 lbs. \$12.90; 300 lbs. \$38.25

MORE FLAX

Today, flax holds a position of importance in the war program. Everything from gunstocks to battleships requires finishes — paints, varnishes, and the like. Vast quantities are also necessary for commercial purposes.

Plant **BISON Flax** — the highest yielding wilt resistant variety for a cash crop.

1 bu. \$4.00; 5 bu. \$19.75; 10 bu. \$39.00
including bags

Flax is the very best nurse crop for alfalfa and grass seed. Plant 1/3 to 1/2 bu. per acre.

Bison Flax

"Sam," himself, in a field of Low Acid CANE six weeks after planting

LOW-ACID CANE

A new introduction of the South Dakota State College, low in Prussic acid, safer for cattle and sheep feeding. Experiment stations show this sorghum produces more forage and feed units per acre than corn regardless of moisture supply. Used for silage too.

It yields 25 to 50 per cent more than other varieties of cane.

10 lbs. \$1.00; 50 lbs. \$4.00; 100 lbs. \$7.65

Grasshoppers left sorghum alone while destroying nearly every other crop in sections of western South Dakota in 1943.

NEW MARTIN'S COMBINE MILO

Drought defying sorghum grain that stands punishment of wind and hot weather. A crop that can be harvested with a grain combine. Produces up to 80 bushels of grain per acre.—See Page 22.

Zinnia

Sweet Pea

Snapdragon

Gladiolus

Six choice sorts of many colors and shades for \$1.45, postpaid; 12 of these tubers for \$2.75, postpaid.

GLADIOLUS
Extra Special Assortment of Large Bulbs—Mixed Colors
Contains 8 to 12 of our best varieties. 12 bulbs, postpaid to you, 80c; 25 bulbs, postpaid to you, \$1.50.

PEONIES

The immense fragrant blossoms put one in mind of oversized fully opened roses. As easy to plant as potatoes. Three assorted Peony roots, pink, red and white colors for \$1.25; six assorted Peonies for \$2.10 postpaid.

CLIMBING and RAMBLER ROSES

CLIMBING AMERICAN BEAUTY—(My pick.) Rich carmine; fragrant; early bloomer. Plants heavy two-year-old No. 1 stock.
DOROTHY PERKINS—Clear shell pink with flowers borne in clusters; full and double. One of the finest of all climbing roses.
CRIMSON RAMBLER—Extremely effective when grown on pillars and trellises. Flowers are produced from ground to tip, in large pyramidal clusters of 30 to 40.
Each, \$1.15; 3 for \$3.15.

SIBERIAN HEDGE ROSES

Fragrant, large beautiful flowers, bloom from June until it freezes. Large bushy plants. Each, 60c; 5 for \$2.50; 10 for \$4.50.

BOBER'S DROUGHT RESISTANT DAHLIAS

TARTARIAN BUSH HONEYSUCKLE

A Wonderful Importation from Russia

The upright or bush form of the Honeysuckle is noted for the great profusion and fragrance of its flowers. Growing from 8 to 12 feet high, they are extremely suitable for shrubby clusters and for individual planting purposes. Also very ornamental in a trained hedge, they will stand clipping to any desired shape. Mixed colors, 2 to 3 ft., each, 50c; 10, \$4.00.

Large select specimen plants for lawn plantings, \$1.00 each; 3 for \$2.80.

LILACS

Prices: Common Purple, White or Persian, 75c each; 5 for \$3.50.

RED SNOWBERRY—A very hardy shrub which succeeds anywhere. Coral berries in autumn and winter. 2 to 3 feet, 65c each.

SPIREA VAN HOUTTEI or BRIDAL VEIL

Hardy everywhere. Large, 75c each; 3 for \$2.15; medium, 50c each; 3 for \$1.40.

CARAGANA or SIBERIAN PEA TREE

Valuable alike for trimmed hedge, shelter belt or ornamental shrub. Foliage resembles that of the locust, and a dainty yellow pea-like flower covers the plant in late May or June. 24 inches, 10 for \$1.20; 25 for \$2.50.

RUSSIAN OLIVE—The hardiest of the Russian importations. It has small yellow flowers produced abundantly, replaced later by small silvery-white, olive-shaped fruits. When trimmed it makes a beautiful ornamental and when cut back forms a most effective hedge. 24 inches, each, 20c; 10 for \$1.50; 25 for \$3.35.

NEW WAYZATA STRAWBERRY PLANTS

This all season strawberry, with the good qualities of the everbearing kinds, is a real money maker. Bearing season of at least three months. Tops the market for its appearance and quality. Here is the very best in Strawberry plants for your money. 25 plants,

\$1.50; 50 plants, \$2.50; 100 plants \$4.00, postpaid.

PROGRESSIVE and **GEM EVERBEARING STRAWBERRY PLANTS**—\$2.50 per 100; **GOLDEN HARVEST**—\$2.00 per 100; **SENATOR DUNLAP**—One crop Strawberry plants, \$1.50 per 100.

New Wayzata

SMALL FRUIT

LATHAM RASPBERRY PLANTS—10 for \$1.50; 25 for \$3.25; 100 for \$6.00.

CARRIE GOOSEBERRY PLANTS—Each, 50c; 10 plants, \$3.50; 25 for \$8.50.

BETA GRAPES—Each, 50c; 5 plants, \$2.00; 10, \$3.50.

PERFECTION CURRANTS—Per plant, 60c; 5 for \$2.50; 10 for \$4.00.

VICTORIA RHUBARB—Large roots, \$1.35 per dozen.

WASHINGTON RUST PROOF ASPARAGUS PLANTS—Two year plants, 25 for \$1.25; 50 for \$2.25.

PLEASE SEND YOUR ORDERS IN EARLY

On account of shortage of help we will not be able to accept late orders for nursery stock.

Chinese Elm

HARDY PEARS

MENDEL PEAR—Grown without winter protection. A Minnesota product, medium size, sweet and juicy, golden yellow color.

TAIT PEAR—Originated in Canada. Perfectly hardy, a good fruiter and of fine quality. Price, your choice of varieties, 3-4 ft., \$1.35 each; 3 trees, \$3.85.

PROF. HANSEN'S MOST FAMOUS PLUMS

For Quickest Return in Fruit

WANETA PLUM—The giant of hardy plums. Up to two inches in diameter. Highly flavored. Richly colored red skin.

TECUMSEH—The most consistent yielder of quality plums. Best record in drought years.

OPATA CHERRY-PLUM—Earliest of all plums. The flesh is a light green color with a purplish red skin. Very productive.

SAPA CHERRY-PLUM—Early, large, productive and hardy. Black purplish flesh is extra fine for eating and wonderful for preserves and jam.

HANSKA PLUM—The superb plum of apricot flavor and fragrance. Very hardy and productive. Highly colored and firm flesh.

EARLY RICHMOND—The earliest of the sour pie cherries. Fruit dark red, medium in size. Tree vigorous and bears young. Does best on upland or sandy soil which is well drained.

OKA CHERRY—Not really a cherry but is a good substitute for a cherry. It is a sand cherry hybrid, a seedling of Champa. Color brighter than Sapa and a black red flesh.

ADAPTED EARLY MATURING APPLES

PROF. HANSEN'S ANOKA APPLE—The wonder Apple, as it usually bears the second year after planting. Very hardy everywhere. Good eating and a heavy producer.

WEALTHY APPLE—The most popular of all early fall apples. Large, bright red, very sweet and fine.

YELLOW TRANSPARENT—Early variety, ripening to a yellow in August. Good eating, being tender and juicy when ripe.

DUCHESSE—Old standard hardy summer variety. Large apple streaked with red. Ripens the first of September.

RED BIRD or CRIMSON BEAUTY—Early apple of bright red color and very attractive. Good quality and flavor. Originated in Canada.

McINTOSH RED—Fruit medium to small in size, beautiful crimson. High quality for marketing and home use. Keeps until mid-winter or later.

DOLGO CRAB—Originated at South Dakota Experiment Station. Tree hardy, vigorous, upright grower. Fruit medium to small, rich in flavor, bright red color. Fine for pickling or jelly.

WHITNEY CRAB—August to September. The fruit is very large and glossy green, striped with red. The flesh is firm, juicy and pleasant. It is a very heavy yielder and highly prized for cider. Nearly the size of an apple.

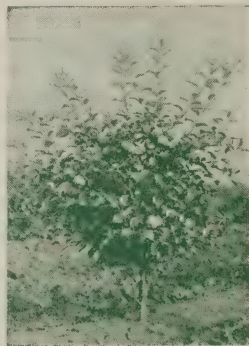

PRICES ON APPLES, CRABS AND PLUMS

Size	Each	Per 10	Per 25
3 to 4 ft.....	\$1.00	\$ 8.80	\$19.00
4 to 5 ft.....	1.35	11.80	26.00

Fruit Trees can be grown anywhere on dry land if you space them properly.

GUARANTEE ON NURSERY STOCK

We guarantee our stock to be strictly first quality and in healthy dormant condition at the time of delivery. Any stock that does not come up to this guarantee will be replaced without charge upon immediate notification thereof. No adjustments after June 15th.

BOBER'S 30-DAY LAWN GRASS

For a Beautiful Lawn
All Season

Order Bober's "30-Day Lawn Grass" early and sow it as soon as the snow melts away in early spring. Sow one pound to 250 square feet and you will have a well established lawn by early summer. This mixture consists of fine leaved and deep rooted perennial grass and some White Dutch Lawn Clover, which assures a beautiful rich green lawn thick and free from weeds.

1 lb. 55c; 3 lbs. \$1.50; 5 lbs. \$2.40; 10 lbs. \$4.40, postpaid.

OUR GRASS SEEDS PRODUCE WONDERFUL LAWNS

RICHGREEN LAWN SEED

HORMONE TREATED SEED will increase germination, root and plant growth, doubling results of untreated seed and also increase drought resistance of your lawn. The very best value in Lawn Grass seed in America.

1 lb. 70c; 3 lbs. \$2.00; 5 lbs. \$3.25; Postpaid

Pure BLUEGRASS, top quality, heavy seed.

WHITE DUTCH LAWN CLOVER Seed.

1 lb. \$1.00; 3 lbs. \$2.90; 5 lbs. \$4.65, Postpaid

Richgreen Lawn Grass

BUFFALO GRASS

Makes Wonderful Lawns in Dry Climate Regions

In the lighter sandier soils, and the dry and semi-dry regions Buffalo Grass has proven highly desirable for lawn use. It is a low growing plant, seldom getting over 6 inches in height; hence needs no cutting and requires very little care. Our seed is treated and scarified to make it grow quicker. Since it is spread from underground root stocks, as well as from seed, once you get a thin stand established, it thickens up all by itself.

1/4 lb. 65c; 1/2 lb. \$1.20

One pound covers 3,000 square feet. \$2.00, Postpaid

FAIRWAY STRAIN OF CANADIAN CRESTED WHEATGRASS

A very hardy, leafy grass easy to start if planted real early in the spring because it germinates better in cool, moist weather. Plant at the rate of one pound to 300 square feet. Very good for dry regions.

1 lb. 45c; 5 lbs. \$2.00, Postpaid

For VICTORY GARDENS

GO-WEST is the best introduction to kill cutworms, slugs, grasshoppers, strawberry root, vegetable weevils and other insect pests. Ready to apply. No mixing.

GO-WEST is a bait made from chopped sweet apples, combined with a poison, extremely attractive to insects. Remains in moist edible condition for many days—rain or shine. Be sure to include a few pound cartons. Garden size carton, covers 400 square feet, for 60c postpaid.

New MONTANA PERENNIAL CLOVER Thrives on Alkali Soils

This plant which looks like a cross between sweet clover and alfalfa was discovered growing in low moist alkali soil in Montana, is cut, cured and stacked like alfalfa. Yields about 4 tons per acre. There are many farms in the west with alkali spots not capable of producing any kind of plant growth and this new Perennial Clover will immediately make such worthless land profitable by being able to grow this new legume for pasture and hay. Two or three cuttings of nutritious hay depending on the season. Plant 5 to 7 pounds per acre late in February or in March. Shallow planting on firm ground is best.

1 lb. \$1.00; 5 lbs. \$4.50, postpaid. Not prepaid, 10 lbs. \$7.50; 25 lbs. \$17.50
